# Cybersecurity Investigator

**Junior Cybersecurity Badge — Girls Build Bots**

**Presented by your robotics mentors!**

# How cyber cases get cracked 🔍

Investigators **don’t guess**. They:

1. Collect **evidence**
2. Check whether each **source** is trustworthy
3. Build a **timeline**
4. *Then* reach a conclusion

**Observation first. Verdict last.**

# Warm-up 🧐

Here’s one suspicious message.

**Before anyone decides anything** — list every clue you can observe.

*Every single one. We’ll decide after.*

# The Case of the Prize Message 📁

**The case:** a classmate got a message saying she won a tablet.

**Is it real?**

Your team gets the case file. Work the evidence.

# Step 1 — Log every clue 

On your evidence sheet: **Clue / What it tells us / Trustworthy?**

Look for: - Misspelled sender - Urgent tone - Link text that doesn’t match the label - A timeline showing the “company” account was created **yesterday**

# Step 2 — Verify 🔎

Go to the verification stations:

- What would checking the **real company's site** show?
- What would **asking the sender directly** reveal?

**A second source is what turns a hunch into evidence.**

# Step 3 — Timeline, then conclusion 

1. Build the **timeline** — what happened, and when?
2. Reach a **conclusion**
3. List the **evidence that supports it**

# Present the Case ⚖️

Like real investigators:

1. The **evidence**
2. The **verification steps**
3. The **conclusion**
4. Your **recommendation** — “don’t click; report it; here’s why”

Other teams get **one cross-examination question**.

# The bar 🎯

**Could you defend your conclusion with evidence alone?**

Not “it felt fishy.” **Evidence.**

# Robot moment 

We investigate a robot failure exactly this way:

- Log the symptoms
- Check **one suspect at a time**
- Only “fix” what the evidence points to

# The Investigator’s three habits 📜

1. **Look before trusting**
2. **Verify with a second source**
3. **Conclusions need evidence**

**Closing:** which clue from today will you spot fastest next time?

# What you accomplished ✅

- Explained how investigators use evidence, sources, and timelines
- Logged clues and rated how trustworthy each one was
- Verified a claim with a second source
- Presented a conclusion supported by evidence

# Keep going at home! 🏠

- Next suspicious message you see: log the clues before you judge
- Practice “verify with a second source” on something you read online
- Ask your troop leader about your next STEM badge!

# 📣 Share Your Impact

**Troop leaders & robotics teams** — if you used this curriculum, please:

1. **Credit us** — the curriculum comes from **Girls Build Bots**
2. **Tag us** — **@girlsbuildbots** on Instagram
3. **Report your results** — email **girlsbuildbots@gmail.com** with how many girls took part, how many badges were earned, and how it went

This is how the program grows — and how the next troop and team get better materials.
