# Showcasing Robots 🌟

**Junior Robotics Badge — Girls Build Bots**

**Presented by your robotics mentors!**

# Welcome to OUR world 🤖

We’re a high school **FIRST Robotics** team!

- We get 6–8 weeks to build a robot the size of a washing machine
- Then we compete against teams from around the world 🌍
- **Watch this competition match video…** 🎬

# There’s a place for EVERYONE 🧩

Robotics teams need: - 👩‍💻 **Programmers** — write the robot’s brain - 🔧 **Builders** — design and machine the parts - 📊 **Strategists** — plan how to win matches - 📣 **Outreach** — teach the community (that’s why we’re here!) - 💼 **Business** — sponsorships and budgets

**You don’t have to love ALL of it to belong in robotics.**

# Now it’s YOUR turn to showcase 🎤

Turn your robot design into a presentation:

1. **The problem** we chose and why it matters
2. **Our robot** — parts and how it works
3. **What went wrong** and how we fixed it
4. **What we’d build next**

Pick your style: poster 🖼️, slides 💻, or live demo theater 🎭

# Presentation power tips 💪

- **Everyone speaks** — divide the four parts among your team
- Practice **twice**, out loud, standing up
- Slow down — nervous people talk fast
- The “what went wrong” part is the BEST part — engineers love failure stories!

# Showcase Fair! 🎪

Science-fair style: - Your team at your station - Visitors rotate through and ask questions - Answer with confidence — **you're the expert on YOUR design**

Awards incoming… 🏆 *Most Creative Sensor… Best Debugging Story… and more!*

# You did it! 🎉

Today you: - ✅ Saw what competitive robotics looks like - ✅ Built a real presentation - ✅ Presented like an engineer - ✅ Finished the entire Robotics badge series! 🥳

# Your next steps 🚀

- **FIRST LEGO League** (ages 9–14) — firstinspires.org/robotics/fll
- Ask your troop leader about STEM events at our school
- **girlswhocode.com** — free clubs and summer programs
- Come see us compete — matches are free to watch and LOUD 📢
